

I just wanted to express how very important to me Air 1 (90.1) is, This radio station gives me an outlet for positive music, a station I don't have to cringe at in case one of the vj, dj's says something crude like other local stations. It has impacted people all over this community, with testimonials of how Air 1 gave them an outlet of peace, one time I even heard how someone had called Air 1's prayer line and decided against committing suicide! What other radio stations out there are saving lives and showing outright compassion?! If you take Air 1 from us all we, including children and teens will have left to be influenced by are the vulgar mouthed dj/vj's who play music that has zero positive impact but much negative. It is an obvious public interest, help our community grow into the potential it can be by supporting positive reinforcements such as Air 1. Thank you for your time.
